FERRYCARRIG

GRADUATE PROGRAM

Graduate Program

BUILD YOUR CAREER WITH FERRYCARRIG

We are excited to invite Civil Engineering, Quantity Surveying and Health and Safety Graduates to join our team at Ferrycarrig. We recognise that our graduates are pivotal to our success, and add huge value to the way we work, think and operate.

At Ferrycarrig, the training and development of our workforce is a significant area of investment. Ferrycarrig is committed to supporting the ongoing professional development of our workforce to ensure that our people learn new skills on the job and grow with our business.

Ferrycarrig has established a Graduate Development Program to ensure the availability of capable and suitably qualified personnel for the delivery of future civil infrastructure projects.

We are seeking enthusiastic graduates who are invested in and committed to their personal and professional development.

From day one you will have the opportunity to deliver high quality, valuable work for our clients, working on innovative and challenging projects, large and small.

We are seeking enthusiastic graduates who are invested in and committed to their personal and professional development.

- We offer competitive remuneration and benefits
- Grow professionally with career pathways and skills development
- Get involved with large civil infrastructure projects in the Greater Sydney area
- Work with a progressive, forward thing and growing business
- Be part of a diverse and inclusive team culture

HEAR FROM OUR PEOPLE

Don't just take our word for it, hear what some of our employees have to say

ALICE TANG

Site Engineer

"The company culture at Ferrycarrig is one that puts their employees first and one that supports your personal development. Everyone works together as a team in a very supportive environment. As an Engineer just starting my career, I have never been afraid to rely on those around me for help and support.

During my time at Ferrycarrig, I have been provided with superb mentorship and invaluable first-hand experience on a construction site, working closely with Foremen and Senior Engineers.

I play an active part in solving engineering problems which helps me develop the necessary critical thinking skills that no other graduate program can offer. Through numerous training sessions and workshops, I have learnt valuable skills that will remain applicable throughout my career."

DAVID KAVANAGH

Quantity Surveyor

"The best part of my journey so far has been the people I have met along the way and had the opportunity to work with, but I am also incredibly grateful for the way that Ferrycarrig has fostered my career development.

Since joining Ferrycarrig I have been involved with many different projects, various clients and a variety of internal operations. No two projects are the same and you always gain new experience from them.

The people and culture at Ferrycarrig are what makes this job so great. As an employee of Ferrycarrig you know that your efforts are genuinely valued and that you're contributing to the overall success of the business"

MICHAEL O'SHAUGHNESSY

Project Engineer

"I think the best part about working with Ferrycarrig is how accommodating the Senior Managers are and their mentorship. I've been entrusted with a lot of responsibility and have seen my role grow exponentially over a short period of time, thanks to the support of the Ferrycarrig team.

Ferrycarrig's leadership team actively promotes personal development and encourages you to take on new and exciting challenges. The collaborative team ethos creates a positive environment for real career development and provides support to help push yourself to grow in your profession."

The changing face of Infrastructure

DIVERSITY & INCLUSION

At Ferrycarrig we're working hard to encourage workplace diversity in all its forms. We are committed to providing an equitable environment where all our employees feel valued and empowered to reach their potential.

We recognise and respect the diversity of backgrounds, beliefs, and experiences that exist within our workforce and community and our policies and initiatives to support diversity, inclusion, and equal opportunity, and address inequalities and eradicate bias and discrimination in the sector.

We foster a friendly and supportive environment where individuality is valued and our employees can be themselves and thrive.

A key diversity and inclusion priority area for Ferrycarrig is promoting gender balance and female participation and inclusion. Ferrycarrig's workforce diversity and inclusion key areas of priority include:

- Communication and education
- Recruitment and retention
- Workplace flexibility

We're building a workforce that reflects the diversity of the societies in which we live and work and changing the face of infrastructure for the better.

We're building a workforce that reflects the diversity of the societies in which we live and work and changing the face of infrastructure for the better

About the Program

PROGRAM STRUCTURE

Over the two-year program, you will learn about our business and our values, your team and most importantly, yourself.

You will develop your decision-making, communication, technical capabilities and critical leadership skills. Alongside invaluable on-the-job experience is the chance to build networks that will last a lifetime.

During the course of the program, you will work on world-class projects and will receive support and development from Senior Engineers, Project Managers and the Senior Leadership Team to ensure you are able to make a significant contribution from the moment you start.

On the job learning includes exposure to a variety of projects, disciplines, and regional locations that will give provide you the opportunity to work with and learn from a variety of different people.

- Formal and informal learning opportunities
- Regular coaching, mentoring and feedback
- A variety of assignments through different projects and locations
